

Stage 1 (pre-registered, NO-GO): regret grows about as the null predicts, and task cost falls overall

a Latent regret of the chosen plan

b True task cost (lower is better)

c Pre-registered gate G1

28/48 cases > 0 (needed 34)
 $d_z = 0.29$ (needed 0.5)
sign-flip $p = 0.051$ (needed < 0.05)
verdict: NO-GO
